This webinar will be recorded. Register to get access to the recording after the event.

We've got amazing news about access to care in animal shelters for 2024.

Thanks to groundbreaking veterinary telemedicine and vaccine legislation, your California shelter can ring in the new year with fewer restrictions around who can provide essential care and how, freeing up your team to more easily meet medical needs in the shelter or community.

Discover how your shelter can:

- Empower RVTs to take charge of vaccine clinics
- Use telemedicine to expand the veterinary care your shelter can provide (in the field, in foster and on-site)
- Increase access to care and decrease unnecessary intake

This must-see webinar will set the stage for everything you do this year. Register today and invite your field officers, veterinary staff and community partners, so you can turn the page to better care together!
